

UPDATES TO THE DKSO PLAN OF ACTION March 31, 2020

Access to Facilities

- Infrared thermometers have replaced the temple and thermometer strips previously used to measure temperatures of all persons entering the facility. Officers are continuing this procedure at all access checkpoints.
- Today, the agency is providing surgical masks for every civilian and sworn employee.

Quarantine Procedures

- The new arrestee quarantine period is extended. New arrestees will now be subject to a 14-day quarantine period – rather than five (5) days - before being housed with the general jail population (or other classification specified at booking).
